SNOWSOUND® Fiber Textiles

Acoustic Technology & Design

Snowsound Fiber Technology

Snowsound's patented, proprietary Fiber textiles provide the industry's leading sound absorption because of a precisely re-engineered weave. By changing the weave to an irregular pattern, Fiber not only absorbs more sound than any textile on the market, it provides acoustic balance and comfort. By specifying Fiber at the recommended fullness and installing it strategically in spaces it can absorb all the sound waves that hit it. It is the Class A sound absorption that allows people in the environment to work, learn or heal at their best.

The choice of different Snowsound Fiber materials and the installation options allow a selective absorption at precise ranges (low, medium, high) or a more uniform absorption at all frequencies. Snowsound Fiber's performance varies based on the selected material and the installation options. The result is both visually and acoustically stunning. Experience the Snowsound difference.

Snowsound Value Proposition

Inspired by nature, Snowsound delivers innovative technology that mimics the properties of freshly fallen snow to absorb excess noise and achieve optimal acoustic clarity in today's active spaces. Snowsound offers a range of patented, proprietary acoustic solutions. Our sound-absorbing panels and textiles share one important, common characteristic–superior acoustic performance.

Our Snowsound Fiber Textiles can achieve an NRC of 1.0, depending on how they are installed. Give yourself the peace of mind that comes with knowing you have purchased the highest quality acoustic solutions.

FAST TURNAROUND
All products are in inventory and ready to ship upon order. Better acoustics are only days away.

WARRANTY
Lifetime warranty against manufacturer's defects.

CLEANING
Snowsound panels can be vacuumed (lightly) with a clean upholstery brush or wiped down with a cloth when stained. A stain remover applied locally is also adequate.

EASY INSTALLATION
All products include hardware needed to assemble the product for installation.

MODULAR
Streamlined shapes can be configured in many ways, a free-standing, ceiling suspended, or wall and ceiling mounted to create beautiful customized spaces.

SUSTAINABILITY
Panels are made entirely of polyester, 100% recyclable and GREENGUARD Gold Certified to meet sustainability and environmental health standards.

Sustainability

Snowsound Fiber is made entirely of 100% recyclable polyester. The superior quality of the materials and workmanship extends the product life with the consequent decrease in materials and energy consumption. Snowsound Fiber does not contain felt, wool or other organic materials that might be difficult to recycle.

All Fiber textiles are:

- GREENGUARD Gold Certified

- Participant in the Declare Labels Program

- Approved mindful MATERIALS

Fiber 1 Color Antimicrobial

Imagine a fully sound-absorbent, antimicrobial textile that helps you be HIPAA compliant. The surroundings of acoustic comfort and privacy. The ONE fabric for healthcare that's good for you.

The industry's only sound-absorbing textile with patented technology that is permanently fire resistant and antimicrobial. The silver ion in the polymer inhibits the growth of bacteria spreading and keeps fiber textiles fresher longer while providing the industry's best acoustic performance.

Peace of mind. Acoustic comfort and privacy. Easy cleaning and maintenance.

Applications: Drapes, Curtains, Blinds, Room Dividers and Partitions.

Cleanability

SNOWSOUND FIBER polyester fabrics can be sanitized and cleaned per CDC Guidelines. The following ingredients can be directly used on surface to be treated:

- 5% hydrogen peroxide
- 2-Propanol 80% (isopropyl alcohol)
- Ethyl alcohol 80%
- Sodium hypochlorite 0.5% (bleach)
- Chloramine-T 5%
- Chlorhexidine 0.05%

Nearly all Snowsound Fiber textures and colorways are also machine washable. Please refer to each product's specification guide for more information available for download at www.snowsoundusa.com.
