

SESSION

supreme durability. endless good looks.

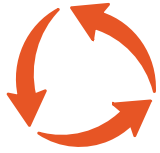

SESSION

Based in Minnesota, USA, Tenjam products are manufactured and distributed throughout North America, and are engineered for use in high-traffic spaces such as schools, healthcare facilities, corporate social areas, libraries, museums, hotels, restaurants, and other public spaces. Tenjam furniture is also perfect for the home, on the patio or around the pool. Combining innovative design with lasting durability, we make furniture that is unique, safe, cleanable, sustainable and fun.

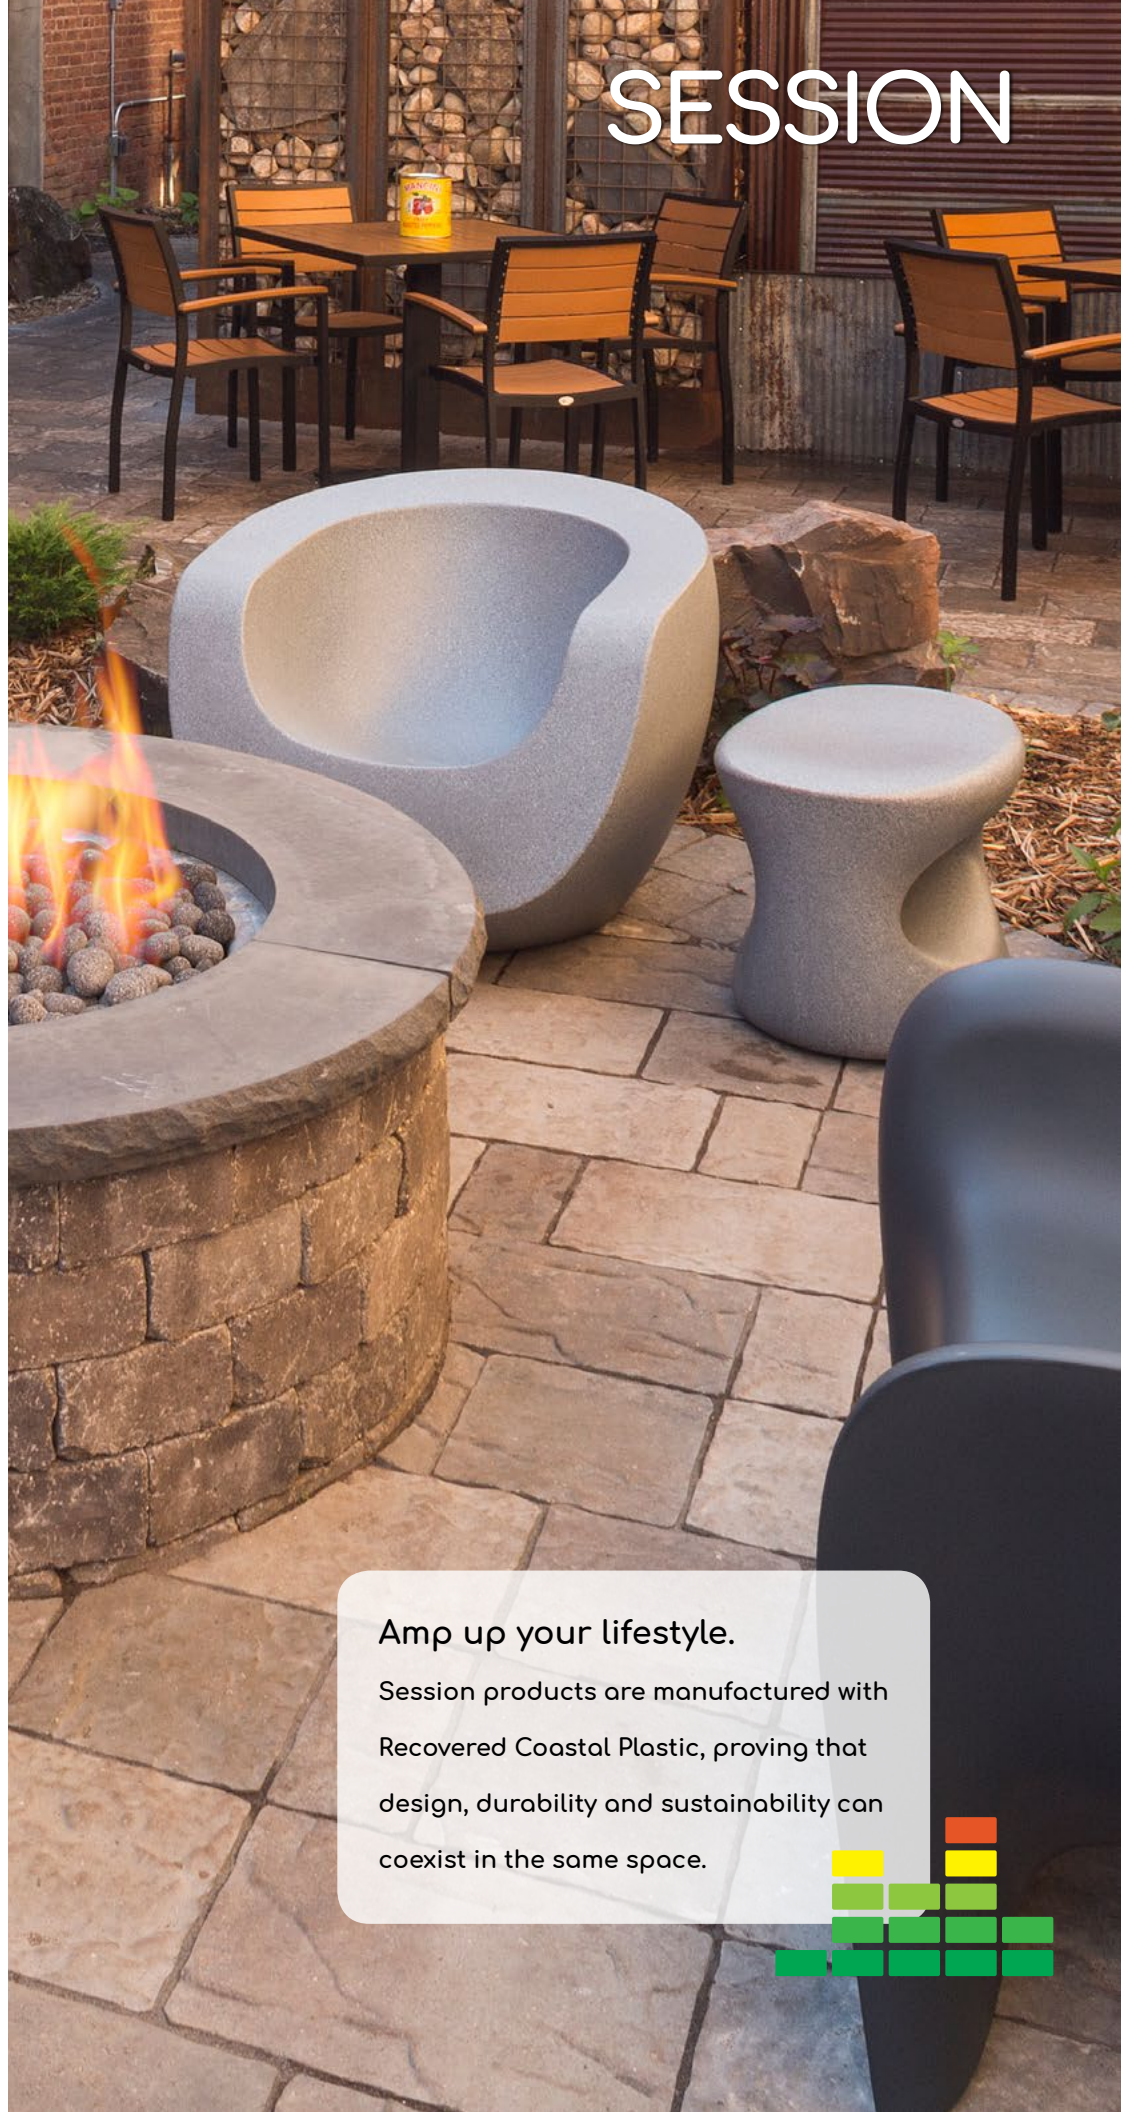

SESSION

RECOVERED COASTAL PLASTIC

Tenjam is possibly the world's first manufacturer to incorporate plastic marine debris into commercial quality furniture. We've proven that recovered coastal plastic material can be economically recovered, formulated and transformed into high performance, 100% recyclable furniture. Tenjam Session series products are also certified as low-emitting material that supports healthier indoor air quality, proving that great-looking furniture can be a sustainable choice, too.

Amp up your lifestyle.

Session products are manufactured with Recovered Coastal Plastic, proving that design, durability and sustainability can coexist in the same space.

WHERE GREAT LOOKS MEET LONG-TERM DURABILITY

Tenjam Session products are manufactured to optimize durability, impact resistance and weight-bearing capacity for indoor and outdoor settings. Fully UV color stabilized, rust-proof and weather-resistant, Session products provide lasting durability in even the harshest environments. Bring on the saltwater, sun, rain and snow—these products can take it!

SESSION

Pump the academic volume.
You can be confident Session products will hold up and look great in high-traffic spaces—indoors and outdoors!
